

mFLOR™

CARE AND MAINTENANCE

Congratulations on the purchase of your **MFLOR** luxury vinyl floor. Like any flooring a little care and maintenance will keep it looking great and performing at its best for longer. The following explains the basic care procedures and offers helpful hints so you will get the best from your new floor

MFLOR has an advanced factory applied Polyurethane surface coating. This gives it up to a 20 year residential surface wear warranty. Polyurethane PUR is a revolutionary surface protection designed to provide the ultimate in vinyl flooring protection. It gives superior scratch and stain resistance as well as being incredibly easy to maintain.

General care and maintenance

Sweep or vacuum the floor regularly to remove any grit or dirt that may scratch or mark the surface. It's a good idea to use good quality door mats to limit the amount of dirt and grit material carried into the house.

We offer a range of cleaning products that have been specifically developed to perform with our floors. PEGULAN/JASOL brand maintenance products are recommended.

Cleaning

Wash floor using PEGULAN/JASOL CLEAN MOP as per directions, to leave a streak free finish.

Note: use of other products in an attempt to maintain your floor may damage the floor, rendering the warranty null and void.

Maintenance products are available through your local flooring retailer.

Care and maintenance suggestions

Whilst MFLOR luxury vinyls are rugged, they are not indestructible. Please note the following suggestions to ensure the longevity and performance of your new MFLOR floor.

- Avoid gouging or scratching of the floor when moving heavy objects. Lift, walk or slide them into position on sheets of hardboard or plywood. The use of a trolley is recommended.
- Avoid heavy point loading on vinyl by ensuring furniture is fitted with suitable swivel glides or castors (not roller castors) with a large enough bearing surface to distribute the weight and prevent indentation of vinyl. The use of castor chairs where MFLOR DROP ZONE has been loose-laid (without adhesive) is specifically not recommended.
- Do not use caustic or ammonia based cleaners. Do not use wax polish.
- Certain rubber products can permanently stain vinyl turning it a yellow colour. Always avoid extended contact with rubber products, such as rubber backed mats, rubber tips on furniture and certain types of shoe soles (particularly black rubber soles). Also be aware that some paving paints or bitumen carried onto vinyl may stain; likewise furniture stains can lead to various shades of discolouration.
- Fading of vinyl can be caused by ultraviolet light and heat from the sun, extreme exposure to sunlight through glass doors and windows must be avoided. Draw your drapes or shades during periods of peak sun exposure.
- Remember that any vinyl flooring can be damaged or scarred by cigarette burns, matches or other very hot items. Particular care should be taken with the use of heating appliances.

Note: MFLOR will not assume responsibility for failure of material caused by any of the above, or for incorrect installation or misuse of material. When in doubt, contact your place of purchase.
